## **DETAILED ACTION**

### ***Response to Amendment***

1. Applicant's amendment of claims 1, 2, 5, 6, 9, 10, 14-16, 19, cancellation of claims 4, 11, 13, and addition of claims 20-23 has been fully considered and is entered.

### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-3, 5-10, 12, 14-19, 21, 23 are rejected under 35 U.S.C. 102(b) as being anticipated by Micali, U.S. Patent No. 4,944,009. Referring to claims 21, 23, Micali discloses a pseudo random sequence generator wherein random sequences are generated for encryption purposes (Abstract) by generating, via parallel processors (synchronizing based on clock), several pseudo random sequences (pseudo noise sequences) that are subsequently concatenated (Col. 6, lines 33-39), which meets the limitation of synchronizing the augmented sequence to a reference clock. Figure 3 shows 4 random sequence generators, which meets the limitation of generated two or more pseudo random noise sequence generators.

### ***Allowable Subject Matter***

4. Claims 20, 22 are allowed.

The following is a statement of reasons for the indication of allowable subject matter: The prior art does not disclose concatenation at arbitrary positions within the pseudo random sequences.
